

Buy-side Due Diligence

Successful growth through mergers and acquisitions require detailed options analyses to evaluate the factors that drive the decision-making process, ensuring a target is selected that will be accretive to value and in line with the Company's corporate and strategic objectives.

Successful company acquisitions also require careful preparation with a detailed analysis of the targets business model, Quality of Earnings, Quality of Assets and Quality of Financial information.

Using investigative analysis to assess the key issues facing a target business such as its underlying business risk, operational strengths and weaknesses, and the drivers of its historic and projected profits and cash flows.
